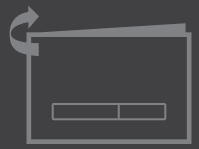
GEBERIT
GEBERIT FLUSH ACTUATORS
THE CHOICE
IS YOURS
DESIGN
MEETS
FUNCTION

MAKE IT
YOUR OWN

It's not just any bathroom, it's your bathroom. The tiles reflect your style. The faucets and fittings strike the perfect balance between form and function. Now choose a flush actuator that gives your bathroom the crowning touch. Geberit flush actuators combine visual elegance with smooth operation, in a wide range of flawless finishes.



WHY NOT TRY OUT YOUR OWN DESIGNS?

The following pages include actual-size images of many of our flush plates. Fold back the left-hand side of the brochure, hold it against the wall, and let your imagination run wild!

66 GEBERIT SYSTEMS
The best part is what you don't see

SIGMA70

FLOATING DESIGN, **MINIMALIST AESTHETIC**

A sleek, frameless design, convex surface, and slimline structure combine to create the floating illusion of this innovative flush actuator plate. Its clean, geometric design and sophisticated materials meet the highest aesthetic standards and make the plate a firm favorite for all those who appreciate its architectural design language.

PRECISION MECHANICS

The Geberit Sigma70 flush plate uses a tried-and-tested mechanism. The gap between the buttons is as narrow and precise as possible, while still providing a visual cue for the water-saving dual flush. Minimalist design provides simple beauty and intuitive operation.

NEW

VARIETY

Sophisticated materials and elegant colors, plus a design that's been perfected down to the last detail: Find the complete Sigma70 collection on page **22**.

DESIGN
FREEDOM

Unobtrusive yet reliable. Geberit ensures convenience and durability – all from behind the wall. The only visible element of the system is the stylish flush actuator plate. Choose the plate that suits your bathroom design from a wide range of options. Any time you feel like a change, switching plates takes only a few seconds: simply lift off the old plate and drop the new plate in its place.

Geberit offers the widest range of options available, beginning with the simple rectangle. Read on and learn how Geberit helps you design the perfect bathroom for your needs…now and in the future.

THE PERFECT SHAPE: **THE CIRCLE**

Aesthetic curves for a relaxing bathroom experience. It's impossible to improve on circles; they can only be restaged and rearranged. Geberit flush actuators interpret round forms in new ways to adapt to today's trends: With or without rims. With finely honed edges. Harmoniously adjacent or flowing one into another.

The result is always well rounded.

ROUND

GEBERIT REMOTE FLUSH

ENHANCED **ACCESSIBILITY**

The optimal solution. In special construction situations, using a remote flush can be the right choice. Perhaps the bathroom layout calls for flush actuation at a different location to increase accessibility. Or maybe the user preference is for a flush control that's as small and elegant as possible. In cases like these, Geberit offers a variety of remote flush options with pneumatic force transmission. All can be placed anywhere within a 5.5 ft. radius of the concealed tank.

Remote Flush Actuator
Type 10, white with polished
chrome accent
↓

←

TOUCHED A THOUSAND TIMES

The pneumatics of the Geberit remote flush Type 01 and Type 10 have been tested for years of stress. The technology is based on air pressure, not electrical current.

→

VANISHING ACT

Available in a variety of colors and materials, Geberit cover plates for service openings are designed to blend in. A tile-bearing version is available for a look that's practically invisible.

PERFECTLY
MATCHED

Seamless design. Toilet and urinal flush controls made to match: the result is a single design thread running through the whole bathroom. Flush plates for urinals can be actuated by hand (pneumatic) or via touchless technology (electronic, infrared detection).

GEBERIT CONCEALED TANKS

THE BEST PART IS WHAT YOU DON'T SEE

Reliable and safe. In the best bathrooms around the world, flush technology is hidden behind the wall – a solution that's more hygienic, quieter, and offers unbeatable stability. Geberit in-wall systems make it all possible.

Used in combination with the matching in-wall tank, Geberit Sigma flush plates cover a wide variety of design styles and user preferences. The Geberit Omega system with matching plates offers great flexibility, especially in pre-wall installations. Both flushing systems offer tool-free maintenance and guaranteed spare parts availability for 50 years.

Only Geberit offers the widest selection of both flush plates and reliable systems for installation of sanitary equipment behind the wall. And now that we've divided our plates and systems into two families with easy-to-remember names – Sigma and Omega – it's easier than ever to match the right flush plate with your preferred installation system.

1 The decorative actuator flush panel grants easy access to internal components. Resolve maintenance issues quickly and make simple change-outs with no tools. Choose front actuation (Sigma), front/top actuation (Omega), or remote flush.

2 Engineered for long life, the fill and flush valves utilize water-saving, dual-flush technology.

3 Tank integrity is guaranteed. The one-piece, integrated, gravity flush tank is individually leak tested for reliability and reinforced to prevent collapse. Plus, the insulation prevents condensation inside the wall.

4 Toilet bolts simply and securely to the Geberit mounting frame. Holds up to 880 lbs, exceeding ASME A112.6.2 strength requirements. WaterSense®-labeled combinations are available: see geberit.us for details.

5 You set the height. Adjustable-height carrier allows in-wall/pre-wall positioning of toilet seat height from 15˝ to 19˝. Accommodates either 2×4 or 2× 6 stud construction.
