

# PLANNING GUIDE **FOR BIDET SEATS & TOILETS**

WITH GEBERIT IN-WALL SYSTEMS

For designers, architects, showroom consultants and contractors with renovation or new construction projects involving Geberit in-wall tank and wall-hung toilets and who want to combine with bidet seat or bidet toilet function from another brand.

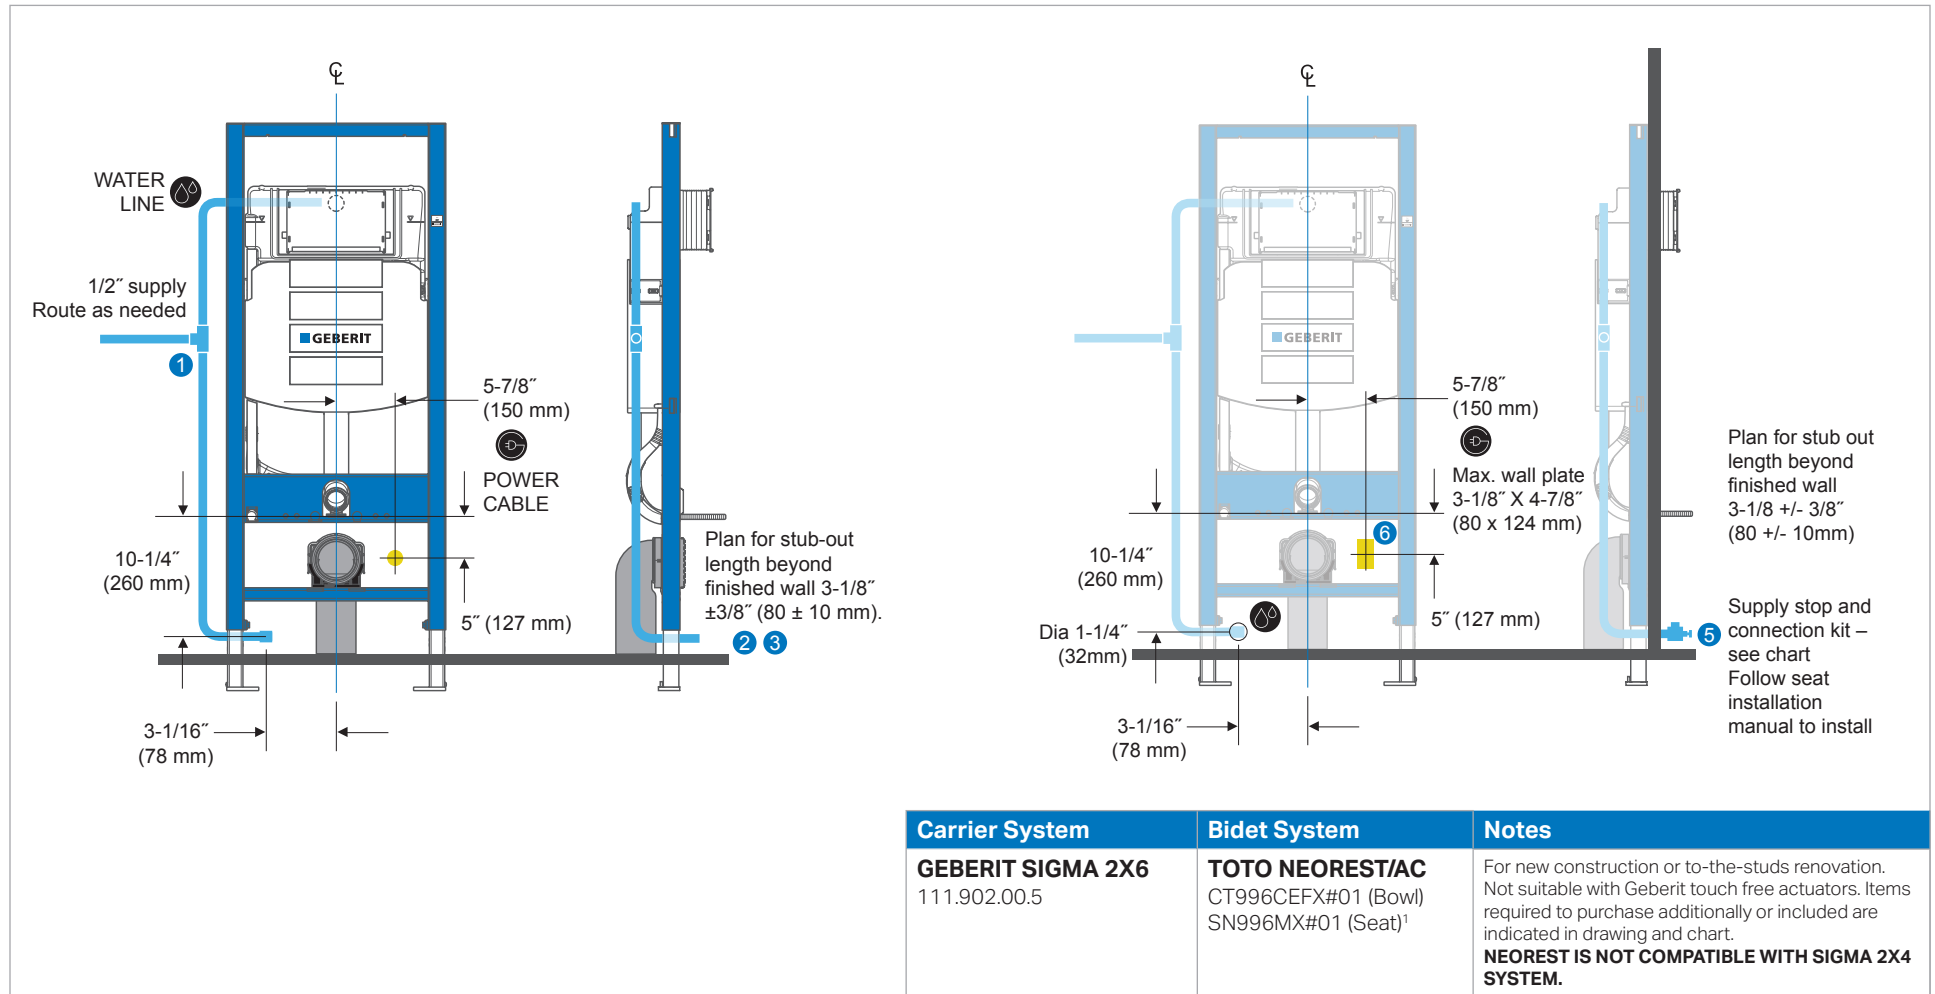

This guide covers everything you need to specify, plan, and source:

- Compatible brands and combinations of toilets, seats and Geberit in-wall systems
- Plumbing and electrical diagrams for rough-in and trim out

Use the index to match up seat or toilet brand and models to the compatible Geberit in-wall system, rough-in diagrams and materials list.

# Touch-free activation using Geberit Type10 IR button

**To activate:** Place hand 3/4" to 4" (19mm to 102 mm) in front of sensor for approx. 0.5–1 second for a full flush and for 2 seconds or longer for a partial flush.

## Accessories

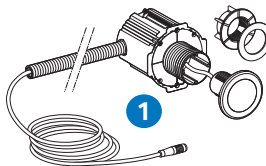

115.861.00.6 **2**  
Required transformer for AC powered Type10 IR buttons.

244.094.00.1 **2A**  
Optional power supply cable extension.

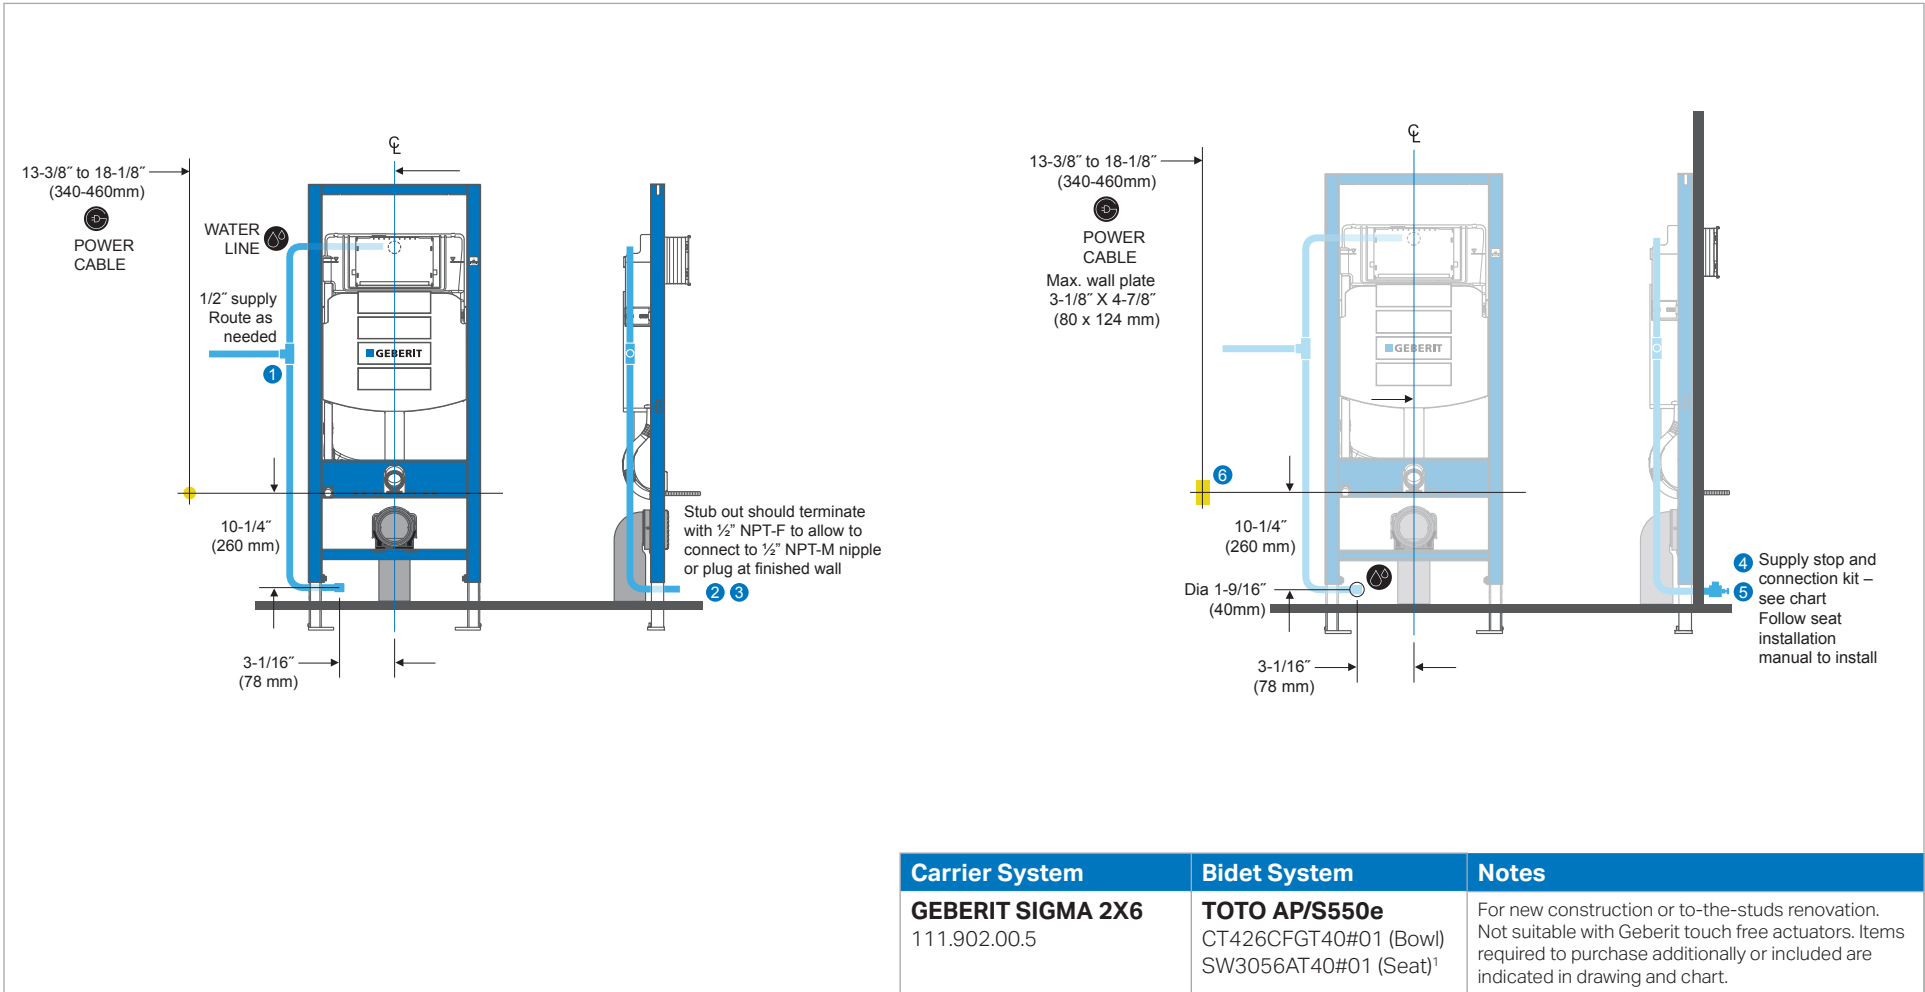

## Easy, touch-free convenience and hygiene.

The Type10 touch-free button delivers comfort, convenience, and hygiene. Type10 is an ideal solution for private or semi-public bathrooms.
